To Whom It May Concern,

I am pleased to recommend Mohammed Alqadda, who successfully completed the internship with the Digital Team within our Product Development Unit at LAB7 from June 16 – August 11, 2025.

During his time with us, Mohammed consistently demonstrated professionalism, adaptability, and a strong understanding of digital workflows. He made valuable contributions to ongoing projects, showing initiative, attention to detail, and the ability to work effectively both independently and within the team.

Mohammed made meaningful contributions across several key projects during his internship. He took a central role in the full deployment of an Authentication, Authorization, and Accounting system, spanning market research, competitor analysis, system configuration, and comprehensive documentation. He demonstrated strong hands-on skills while supporting the testing and customization of various backup solutions to meet the team's operational needs. Additionally, Mohammed developed a backend endpoint to monitor application deployment health, showing his ability to deliver practical, scalable solutions. His forward-thinking mindset, broad technical skills, and team-oriented attitude made him a valuable addition to our team.

His positive attitude and eagerness to learn made him a pleasure to work with. I am confident He will bring the same commitment and quality to any future opportunity.
Please feel free to contact me for further information.

Sincerely,
Mohammed AlMunea
Digital Group Lead - Product Development Unit
